Faerie House Assemblage

Art and Design 3200

Sculpture Review

- There are three main types of sculptures:

  - In-the-Round

  - Relief

  - Assemblage

Types of Sculptures

- **<u>In-the-Round:</u>** Sculpture which is viewed from all sides and is freestanding.

- **<u>Relief:</u>** A type of sculpture in which the form projects (or "pops up") from a background.

- **<u>Assemblage:</u>** A three-dimensional piece of art made of various materials such as found objects, paper, wood, and textiles.

Faerie House Assemblage

- For this project you will create a faerie house that will be an **assemblage** sculpture. It will be constructed from found objects.

- You will also have to research NL faerie lore (stories).

- Your faerie house will be placed along a real faerie path. It must:
    - Be small so that it can be hidden along the path
    - Blend in with nature (faeries do not like to be seen often)
    - Be well constructed so that it can withstand the harsh NL climate

- Take your time and focus on the details. Be creative!

Technical Requirements

- Although the focus should be on your creativity and unique faerie house designs, you will also be required to complete the following requirements:

  - You will need to sketch a ***detailed*** drawing of your faerie house in the environment in which it will be placed.

  - You will need to choose what type of faerie you will be creating the house for (the type of faerie will determine the style of house you create).

  - You must include at least **three** objects from nature.
  - Your sculpture must be **freestanding**.

Diary of a Crafty Lady

Faerie House Evaluation

- You will be evaluated on the following:

  ◦ Faerie House Drawing

  ◦ Faerie Research Questions

  ◦ Followed Instructions

  ◦ Effort/Neatness

  ◦ Level of Completion

  ◦ Quality of Assemblage

  ◦ Creativity
